

JDJ Architects is a Chicago-based architecture + space planning firm that specializes in commercial interior projects for corporate clients, healthcare clients and building owners. Our experience working with an array of clients has provided us expertise in a variety of project sizes, budgets, and styles. JDJ Architects designs user-focused workplace & healthcare environments that place our clients' sensibilities and aspirations at the heart of each design process.

We are currently seeking a dynamic and well-rounded Interior Architect or Interior Designer with at least 3-5 years of healthcare interiors experience to join our team. This position will be responsible for all project phases from space planning through construction documents. Ideal applicant is a self-starter with a high attention to detail. Must be a forward-thinker who possesses strong interior design skills, knowledge of sustainable materials, and be responsible for the development of Construction Documents. The candidate must have excellent space planning skills and an eye for design to develop material and color palettes for a wide range of design projects.

SKILLS/RESPONSIBILITIES

Design

- Advanced understanding of programming, planning, and design principles and methods
- Utilizes programmatic needs of clients to develop efficient and effective space plans at a high level to solve design problems
- Develops and presents material finish selections and mood boards for client review
- Develops lighting plans to effectively communicate design intent
- Works with the Marketing team to create design development tools in support of company growth

Technical

- Assists senior staff with verification of site details to support design
- Produces CD's, and reviews material samples and shop drawings for permit submittal
- Responds to submittals and RFIs as needed

Management

- Develops and maintains positive client relations and contacts
- Manages client communication and consultant coordination to ensure job success
- Ability to work in a fast-paced environment and manage multiple projects concurrently
- Provides project team leadership

Qualifications

- Bachelor's Degree in Interior Design or Architecture
- 3-5 years minimum experience of commercial/ healthcare interiors.
- Experience in production of construction documents required
- Proficiency in Revit, AutoCAD, and Adobe Creative Suite programs
- Proficiency in Microsoft Office Suite
- Basic knowledge of building codes, specifications, building and engineering systems
- Excellent organization, planning, and prioritization skills
- Demonstrates effective verbal and written communication skills
- Strong artistic skills, including hand rendering and sketching capabilities preferred
- Authorization to work in the United States

JDJ CULTURE/BENEFITS

At JDJ Architects, we believe in a healthy work-life balance and are committed to the personal and professional development of our employees. Our staff is our biggest asset and we value and recognize the contribution of each team member.

Competitive salary and a good benefits plan are offered and will commensurate with ability and experience.
